**LEDs for Pedestrian and Pathway Lights: Design, Ecology, Technology**

**Thursday, September 22, 2011**

**11:45a – 1:15p**

*1 credit course as accredited by LA CES.*

### Course summary:

Advanced technology has made LED-lighting a viable solution for outdoor environments. The unwanted side-effects of traditional lighting: wasted energy, maintenance costs, and the negative visual and environmental impacts of over-illumination, are driving the adoption of LED lighting for many projects. This session covers cutting edge information about human interaction with color, contrast, and glare that enhance the visual experience while protecting the environment. Brandon Renouf, IES, Lighting Engineer at Landscape Forms, will present concepts that leave participants armed to evaluate LED-lighting for future projects. Solid State/LED technology is an important facet to sustainable site design.

**All who attend** (in person or virtually) and complete the quiz **will be entered in a drawing** for one chill lounge chair (your choice of color) delivered directly to your door!

### Attend in person:

**HOK** - 211 North Broadway, Suite 700 or

**SWT** - 772 Big Bend Blvd.

- It's **free** and Site Source will provide **lunch!**
- Limited to the first 40 people at HOK; first 25 people at SWT.
- Please arrive by 11:45 to sign in and get settled. The webinar begins promptly at noon.
- Immediately following the webinar you'll complete a written quiz and course evaluation. Scoring 75% or higher awards you one credit.
- Landscape Forms will file your CEU credit and email you a certificate within 20 days.
- Send your preferred email address and your commitment to attend the HOK or the SWT location (along with any special lunch requirements) to [stacye@landscapeforms.com](mailto:stacye@landscapeforms.com)

### Attend virtually:

**In a conference room near you:**

- BYO-Lunch, the webinar is free!
- Your site needs a conference speaker phone and computer with high-speed internet connection (& a projector if accommodating several people).
- Limited to the first 20 locations. Stacy will email connection info on Wed. (9/21/11).
- Please arrive by 11:45 to get settled. The webinar begins promptly at noon.
- You will receive a course evaluation and quiz via email. Return both within 24 hours of receipt and a score of 75% or higher awards you one credit.
- Landscape Forms will file your credit and email a certificate within 20 days.
- Send your preferred email address and gathering location to [stacye@landscapeforms.com](mailto:stacye@landscapeforms.com)
